The *Business*

The parks have performed on a consistent basis throughout recent times with each being well placed to capture revenue as consumers continue to consider travel and tourism as a top priority despite economic headwinds, with the parks providing a secure income.

Each park is operated individually within the Group with a head office undertaking high level functions such as VAT, payroll, accounting and statutory obligations.

The parks operate on a predominately holiday/second home ownership and residential trading model in which income is generated from static and residential caravan sales and pitch fees; with the pitch fee and rental income providing a relatively consistent core income.

Private owners are issued with a pitch licence agreement / mobile home agreement and there remain significant opportunities for caravan sales with high sales values achievable on vacant pitches.

The turnover for H1 2024 for each park can be seen in the summary table, and the parks remain well positioned to take advantage of the continued prevalence of UK based / staycation holiday.

We believe that scope exists to further grow revenue and profitability for the following key reasons:

- Strong local market reputation, with opportunity to cross sell units across the portfolio;
- Each park offers a distinctive experience whilst at the same time having synergy across the group;
- Excellent locations in and around popular areas;
- Additional land and planning / development upsides;
- Increase sales profits and conversion and increase pitch occupancy.

The portfolio offers an exciting opportunity to acquire an established group of parks in Northern Ireland to either create or add to an existing portfolio.
