Primary energy use

The primary energy use for this property per year is 200 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend **£1,772 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £293 per year** if you complete the suggested steps for improving this property's energy rating.

This property produces	6.2 tonnes of CO2
This property’s potential production	5.1 tonnes of CO2

You could improve this property’s CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Increase hot water cylinder insulation	£15 - £30	£19
2. Heating controls (room thermostat)	£350 - £450	£87
