

Energy performance certificate (EPC)

8 Longlands Road
NEWTOWNABBEY
BT36 7LZ

Energy rating
Valid until: **November 2032**

D

Certificate
number
**9091-
2757-
3598-
2602-
7371**

Property type
Mid-terrace house

Total floor area
59 square metres

Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be D.

[See how to improve this property's energy performance.](#)

The graph shows this

property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D

the
average

energy
score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says “assumed”, it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, no insulation (assumed)	Very poor
Roof	Pitched, insulated (assumed)	Good
Window	Fully double glazed	Average
Main heating		Good

Feature	Description	Rating
	Boiler and radiators, mains gas	
Main heating control	Programmer, no room thermostat	Very poor
Hot water	From main system	Good
Lighting	Low energy lighting in 70% of fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Floor	Solid, limited insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 317 kilowatt hours per square metre (kWh/m²).

Environment impact of this property

This property's current environmental impact rating is D. It has the potential to be C.

Properties are rated in a scale from A to G based on how much carbon dioxide (CO₂) they produce.

Properties with an A rating produce less CO₂ than G

rated properties.

An average UK household produces

This property produces

This property's potential production

By making the [recommended changes](#), you could reduce this property's CO₂ emissions by 0.5 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy

use. They may not reflect how energy is consumed by the people living at the property.

Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from D (64) to D (68).

Step	Typical installation cost	Typical yearly saving
1. Low energy lighting	£15	£15
2. Heating controls (room thermostat and TRVs)	£350 - £450	£80
3. Solar water heating	£4,000 - £6,000	£24
4. Internal or external wall insulation	£4,000 - £14,000	£21
	£3,500 - £5,500	£353

Step	Typical installation cost	Typical yearly saving
5. Solar photovoltaic panels		

Paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme](https://www.gov.uk/guidance/check-if-you-may-be-eligible-for-the-boiler-upgrade-scheme-from-april-2022)

(<https://www.gov.uk/guidance/check-if-you-may-be-eligible-for-the-boiler-upgrade-scheme-from-april-2022>).

This will help you buy a more efficient, low carbon heating system for this property.

[Find energy grants and ways to save energy in your home](https://www.gov.uk/improve-energy-efficiency)

(<https://www.gov.uk/improve-energy-efficiency>).

Estimated energy use and potential savings

Estimated £726
yearly
energy
cost for
this
property

Potential £94
saving

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on

how energy is used by the people living at the property.

The potential saving shows how much money you could save if you [complete each recommend step in order](#).

Heating use in this property

Heating a property usually makes up the majority of energy costs.

**Potential
energy
savings by
installing
insulation**

The
assessor
did not find

any
opportunitie
to save
energy by
installing
insulation
in this
property.

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.

Assessor contact details

Assessor's name	Patricia Best
Telephone	07788108883
Email	patricia@bestprc

Accreditation scheme contact details

Accreditation scheme	Stroma Certification Ltd
Assessor ID	STRO032003
Telephone	0330 124 9660
Email	certification@stroma.co.uk

Assessment details

Assessor's declaration	No related party
Date of assessment	3 November 2022
Date of certificate	3 November 2022
Type of assessment	RdSAP
