

Energy performance certificate (EPC)

83 Fairhill Park BELFAST BT15 4FY	Energy rating G	Valid until: 4 February 2034 Certificate number: 0360-2355-0320-2504-3431
---	---------------------------	--

Property type	End-terrace house
Total floor area	62 square metres

Energy rating and score

This property's energy rating is G. It has the potential to be D.

[See how to improve this property's energy efficiency.](#)

Score	Energy rating	Current	Potential
92+	A		
81-91	B		
69-80	C		
55-68	D		68 D
39-54	E		
21-38	F		
1-20	G	15 G	

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, 75 mm loft insulation	Average
Window	Fully double glazed	Average
Main heating	Room heaters, electric	Very poor
Main heating control	No thermostatic control of room temperature	Poor
Hot water	Electric immersion, standard tariff	Very poor
Lighting	Low energy lighting in 11% of fixed outlets	Poor
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 642 kilowatt hours per square metre (kWh/m2).

► [About primary energy use](#)

Additional information

Additional information about this property:

- Cavity fill is recommended

How this affects your energy bills

An average household would need to spend **£4,036 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £2,619 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Impact on the environment

This property's environmental impact rating is F. It has the potential to be E.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces	6 tonnes of CO2
This property produces	6.7 tonnes of CO2
This property's potential production	4.3 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Changes you could make

► [Do I need to follow these steps in order?](#)

Step 1: Increase loft insulation to 270 mm

Typical installation cost £100 - £350

Typical yearly saving £134

Potential rating after completing step 1

17 G

Step 2: Cavity wall insulation

Typical installation cost £500 - £1,500

Typical yearly saving £804

Potential rating after completing steps 1 and 2

29 F

Step 3: Hot water cylinder insulation

Increase hot water cylinder insulation

Typical installation cost £15 - £30

Typical yearly saving £142

Potential rating after completing steps 1 to 3

32 F

Step 4: Low energy lighting

Typical installation cost £40

Typical yearly saving £44

Potential rating after completing steps 1 to 4

33 F

Step 5: High performance external doors

Typical installation cost £1,000

Typical yearly saving £77

Potential rating after completing steps 1 to 5

34 F

Step 6: Heat recovery system for mixer showers

Typical installation cost £585 - £725

Typical yearly saving	£86
-----------------------	-----

Potential rating after completing steps 1 to 6
--

36 F

Step 7: High heat retention storage heaters

Typical installation cost	£1,600 - £2,400
---------------------------	-----------------

Typical yearly saving	£1,331
-----------------------	--------

Potential rating after completing steps 1 to 7
--

68 D

Step 8: Floor insulation (solid floor)

Typical installation cost	£4,000 - £6,000
---------------------------	-----------------

Typical yearly saving	£126
-----------------------	------

Potential rating after completing steps 1 to 8
--

70 C

Step 9: Solar water heating

Typical installation cost	£4,000 - £6,000
---------------------------	-----------------

Typical yearly saving	£85
-----------------------	-----

Potential rating after completing steps 1 to 9
--

72 C

Step 10: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£3,500 - £5,500
---------------------------	-----------------

Typical yearly saving	£589
-----------------------	------

Potential rating after completing steps 1 to 10

85 B

Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Richard Gallagher
-----------------	-------------------

Telephone	07530 113548
-----------	--------------

Emailrickygallaugh@gmail.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme

Elmhurst Energy Systems Ltd

Assessor's ID

EES/017768

Telephone
